Risks

An investment in the Fund is subject to investment risk, including the possible loss of principal. Ownership of real estate is subject to fluctuations in the value of underlying properties, the impact of economic conditions on real estate values, the strength of specific industries renting properties and defaults by borrowers or tenants. Real estate is a cyclical business, highly sensitive to general and local economic conditions and developments, and characterized by intense competition and periodic overbuilding. Credit and interest rate risk may affect real estate companies' ability to borrow or lend money.

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information, please call 866.513.5856 or visit www.alpsetfs.com. Please read the prospectus carefully before investing.

Cohen & Steers Global Realty Majors® Portfolio Index (GRM) is a free-float adjusted, modified market capitalization-weighted index of global real estate equities. The modified market capitalization weighting approach and qualitative screening process emphasize those companies that, in the opinion of the Cohen & Steers investment committee, are leading the securitization of real estate globally.

FTSE EPRA/NAREIT Developed Real Estate Index: An unmanaged market-weighted total return index that consists of many companies from developed markets whose floats are larger than \$100 million and which derive more than half of their revenue from property-related activities.

S&P 500 Index: An index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors.
